

Operating manual mic+ Ultrasonic Sensors with two switched outputs

- mic+25/DD/TC mic+25/EE/TC
- mic+35/DD/TC mic+35/EE/TC
- mic+130/DD/TC mic+130/EE/TC
- mic+340/DD/TC mic+340EE/TC
- mic+600/DD/TC mic+600/EE/TC

Product description

- The mic+sensor with two switched outputs measures the distance to an object within the detection zone contactless. Depending on the adjusted detect distance the switched outputs are set.
- All settings are done with two push-buttons and a three-digit LED-display (TouchControl).
- Light emitting diodes (three-colour LEDs) indicate the switching status.
- The output functions are changeable from NOC to NCC.
- The sensors are adjustable manually using the numerical LED-display or may be trained using Teach-in processes.
- Useful additional functions are set in the Add-on-menu.
- Using the LinkControl adapter (optional accessory) all TouchControl and additional sensor parameter settings may be made by a Windows-Software.

Important instructions for assembly and application

All employee and plant safety-relevant measures must be taken prior to assembly, start-up, or maintenance work (see operation manual for the entire plant and the operator instruction of the plant).

The sensors are not considered as safety equipment and may not be used to ensure human or machine safety!

The mic+ sensors indicate a **blind zone**, in which the distance cannot be measured. The **operating range** indicates the distance of the sensor that can be applied with normal reflectors with sufficient function reserve. When using good reflectors, such as a calm water surface, the sensor can also be used up to its **maximum range**. Objects that strongly absorb (e.g. plastic foam) or diffusely reflect sound (e.g. pebble stones) can also reduce the defined operating range.

Synchronisation

If the assembly distances shown in Fig.1 for two or more sensors are exceeded the integrated synchronisation should be used. Connect Sync/Com-channels (pin 5 at the units acceptable) of all sensors (10 maximum).

Fig. 1: Assembly distances, indicating synchronisation/multiplex

Multiplex mode

The Add-on-menu allows to assign an individual address »01« to »10« to each sensor connected via the Sync/Com-channel (Pin5). The sensors perform the ultrasonic measurement sequentially from low to high address. Therefore any influence between the sensors is rejected.

The address »00« is reserved to synchronisation mode and deactivates the multiplex mode. (To use synchronised mode all sensors must be set to address »00«.)

Assembly instructions

- Assemble the sensor at the installation location.
- Plug in the connector cable to the M 12 connector.

Fig. 2: Pin assignment with view onto sensor plug and colour coding of the microsonic connection cable

Start-up

- mic+ sensors are delivered factory made with the following settings:
- Switched outputs on NOC
 - Detecting distances at operating range and half operating range
 - Measurement range set to maximum range

Set the parameters of the sensor manually or use the Teach-in procedure to adjust the detect points.

Fig. 3: TouchControl

Operation

mic+ sensors work maintenance free. Small amounts of dirt on the surface do not influence function. Thick layers of dirt and caked-on dirt affect sensor function and therefore must be removed.

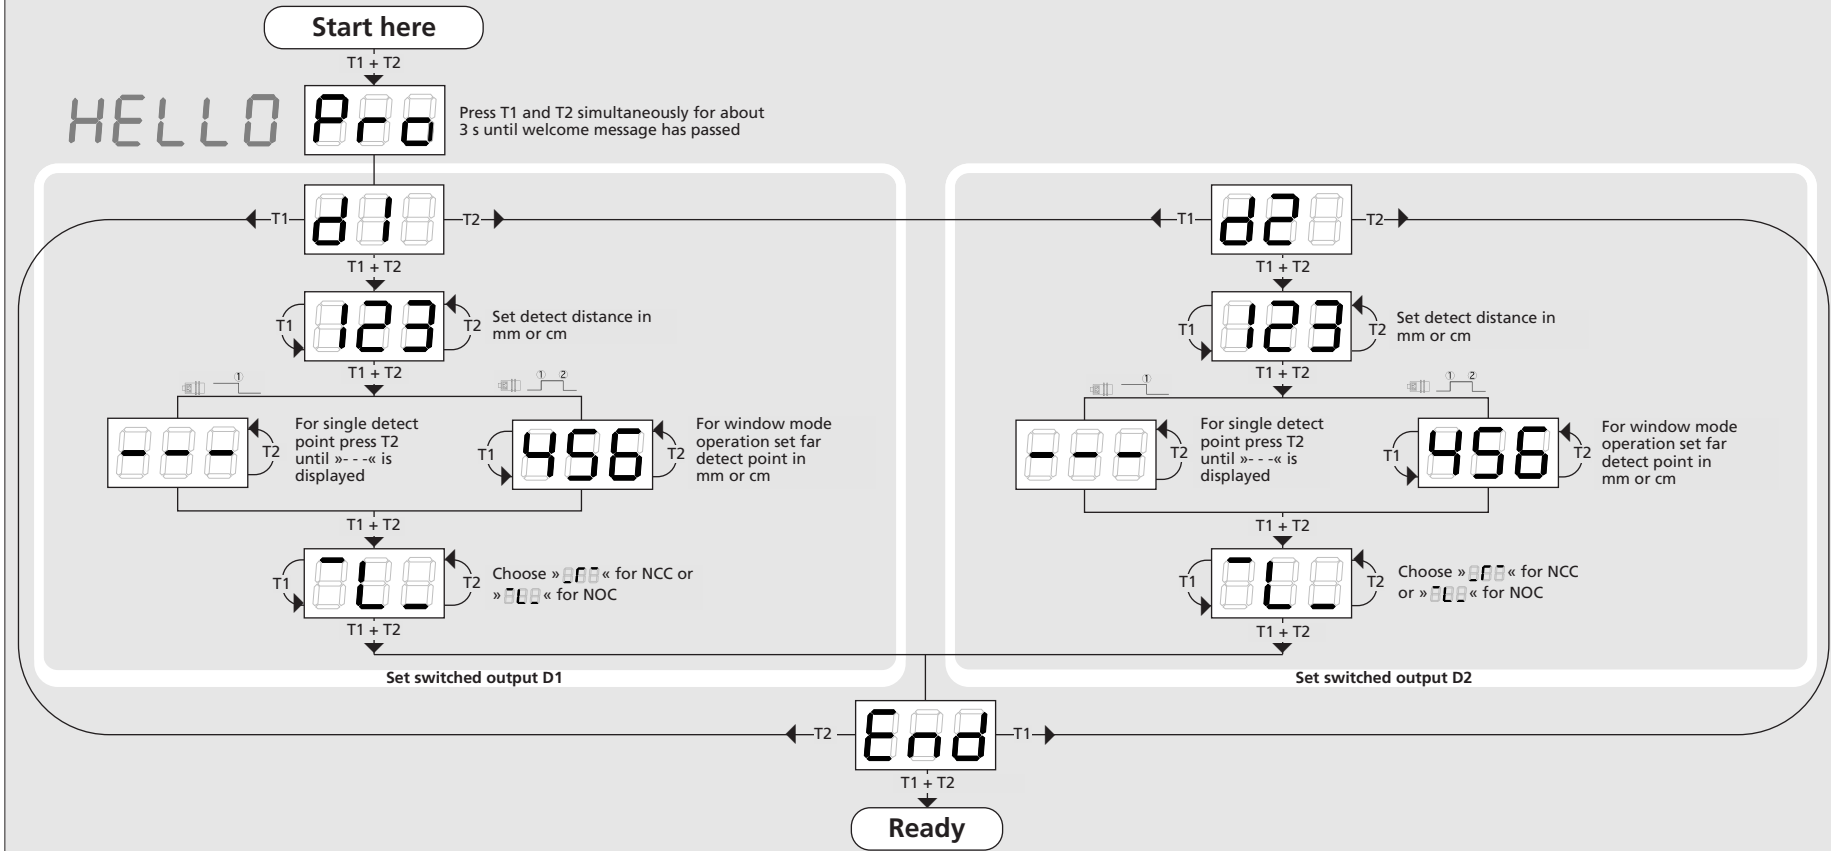

Note

- mic+ sensors have internal temperature compensation. Because the sensors heat up on their own, the temperature compensation reaches its optimum working point after approx. 30 minutes of operation.
- During normal mode operation, a yellow LED signals that the corresponding switched output has connected.
- During normal mode operation, the measured distance value is displayed on the LED-indicator in mm (up to 999 mm) or cm (from 100 cm). Scale switches automatically and is indicated by a point on top of the digits.
- During Teach-in mode, the hysteresis loops are set back to factory settings.
- If no objects are placed within the detection zone the LED-indicator shows »- -«.
- If no push-buttons are pressed for 20 seconds during parameter setting mode the made changes are stored and the sensor returns to normal mode operation.
- You can lock the key pad to provide inputs, see »Key lock and factory setting«.
- You can reset the factory settings at any time, see »Key lock and factory setting«.

Show parameters

Tapping push-button T1 shortly during normal mode operation shows »PAR« on the LED-display. Each time you tap push-button T1 the actual settings of the switched outputs are shown.

Set sensor parameters alternatively numerically using LED-display...

HM 1909
2014/30/EU

Enclosure Type 1
For use only in industrial machinery NFPA 79 applications.

The proximity switches shall be used with a Listed (CYJV/7) cable/connector assembly rated minimum 32 Vdc, minimum 290 mA, in the final installation.

...or with the Teach-in procedure

Adjust detect point D1
Place object at position ①
Press T1 until »d1« is shown

Adjust window mode D1
Place object at position ①
Press T1 until »d1« is shown

Adjust two-way reflectivity barrier D1
Place reflector at position ①
Press T1 until »d1« is shown

Set NOC/NCC D1
Press T1 until countdown passed from »-8-« to »-0-« and NOC or NCC symbol is displayed

Normal mode operation
Teach-in switched output D1

Adjust detect point D2
Place object at position ①
Press T2 until »d2« is shown

Adjust window mode D2
Place object at position ①
Press T2 until »d2« is shown

Adjust two-way reflectivity barrier D2
Place reflector at position ①
Press T2 until »d2« is shown

Set NOC/NCC D2
Press T2 until countdown passed from »-8-« to »-0-« and NOC or NCC symbol is displayed

Normal mode operation
Teach-in switched output D2

Key lock and factory setting

Activate/deactivate TouchControl
Turn supply voltage OFF
While pressing T1 turn supply voltage ON until »on« or »off« is displayed
To activate or deactivate press T1

Reset to factory setting
Turn supply voltage OFF
Turn supply voltage ON while pressing T1 and keep it pressed for ca. 13 s until »ESE« has passed through the display
To activate or deactivate press T1

Normal mode operation

Usefull additional functions in Add-on menu (for experienced users only, settings not required for standard applications)

Start here
HELLO Pro **Add-on**
Press T1 and T2 simultaneously for about 13 s until »Add« is shown in the LED-display

<p>Ready</p> <p>»C01«: Display bright »C02«: Display dimmed »C03«: Display off</p> <p>Low power mode</p>	<p>Minimum value: »001« Maximum value: difference between maximum range and detect point - 1 During window mode operation hysteresis influences both detect points.</p> <p>Hysteresis switched output D1</p>	<p>Minimum value: »001« Maximum value: difference between maximum range and detect point - 1 During window mode operation hysteresis influences both detect points.</p> <p>Hysteresis switched output D2</p>	<p>»F00«: no filter »F01«: standard filter »F02«: averaging filter »F03«: foreground filter »F04«: background filter</p> <p>Measurement filter</p>	<p>Defines the strength of the chosen filter. »P00«: weak filter up to »P09«: strong filter</p> <p>Filter strength</p>	<p>Delay in seconds between the detection of an object and the output of the measured distance in case of object approach (behaves as on-delay). Note
Changes in the Add-on menu may impair the sensor function.
A6, A7, A8, A10, A11, A12 have influence on the response time of the sensor.

Technical data

Blind zone	0 to 30 mm	0 to 65 mm	0 to 200 mm	0 to 350 mm	0 to 600 mm
Operating range	250 mm	350 mm	1.300 mm	3.400 mm	6.000 mm
Maximum range	350 mm	600 mm	2.000 mm	5.000 mm	8.000 mm
Angle of beam spread	Please see detection zone				
Transducer frequency	ca. 320 kHz	ca. 400 kHz	ca. 200 kHz	ca. 120 kHz	ca. 80 kHz
Resolution, sampling rate	0,025 mm				
Reproducibility	± 0,15 %				
Accuracy	± 1 % (Temperature drift internal compensated, may be deactivated ¹⁾ ; 0,17%/K without compensation)				

Detection zones for different objects:
The dark grey areas are determined with a thin round bar (10 or 27 mm dia.) and indicate the typical operating range of a sensor. In order to obtain the light grey areas, a plate (500 x 500 mm) is introduced into the beam spread from the side. In doing so, the optimum angle between plate and sensor is always employed. This therefore indicates the maximum detection zone of the sensor. It is not possible to evaluate ultrasonic reflections outside this area.

Operating voltage U_B	9 V to 30 V DC, reverse polarity protection, Class 2	9 V to 30 V DC, reverse polarity protection, Class 2	9 V to 30 V DC, reverse polarity protection, Class 2	9 V to 30 V DC, reverse polarity protection, Class 2	9 V to 30 V DC, reverse polarity protection, Class 2
Voltage ripple	±10 %				
No-load supply current	≤ 80 mA				
Housing	Brass sleeve, nickel-plated, plastic parts: PBT, TPU; Ultrasonic transducer: polyurethane foam, epoxy resin with glass content				
Class of protection to EN 60529	IP 67				
Norm conformity	EN 60947-5-2				
Type of connection	5-pin initiator plug, PBT				
Controls	2 push-buttons (TouchControl)				
Indicators	3-digit LED-display, 2 three-colour LEDs				
Programmable	Yes, with TouchControl and LinkControl				
Operating temperature	-25°C to +70°C				
Storage temperature	-40°C to +85°C				
Weight	150 g	150 g	150 g	210 g	270 g
Switching hysteresis¹⁾	3 mm	5 mm	20 mm	50 mm	100 mm
switching frequency¹⁾	25 Hz	12 Hz	8 Hz	4 Hz	3 Hz
Response time¹⁾	32 ms	64 ms	92 ms	172 ms	240 ms
Time delay before availability	< 300 ms				
Order No.	mic+25/DD/TC	mic+35/DD/TC	mic+130/DD/TC	mic+340/DD/TC	mic+600/DD/TC
Switched output	2 x npn, U _B - 2 V, I _{max} = 2 x 200 mA switchable NOC/NCC, short-circuit-proof				
Order No.	mic+25/EE/TC	mic+35/EE/TC	mic+130/EE/TC	mic+340/EE/TC	mic+600/EE/TC
Switched output	2 x npn, -U _B + 2 V, I _{max} = 2 x 200 mA switchable NOC/NCC, short-circuit-proof				

1) Can be programmed with TouchControl and LinkControl
