HM 2610

MH60 SERIES

Key-Features:
- *Cost-effective sensor for construction machinery and mobile hydraulics*
- *Extreme robust construction*
- *Three housing variations for different environments*
- *Measurement ranges from 1 to 4 m*
- *Linearity up to ±0.1 % of full scale*
- *Output signals: potentiometer, current, voltage or CANopen, optional redundant output*
- *Teachable outputs: 0...5 V, 0...10 V*
- *Protection class up to IP69K (suitable for steam and high pressure cleaning)*
- *Temperature range -20...+85 °C (optional -40 °C)*
- *Optional with TEDS connector*

TECHNICAL DRAWING

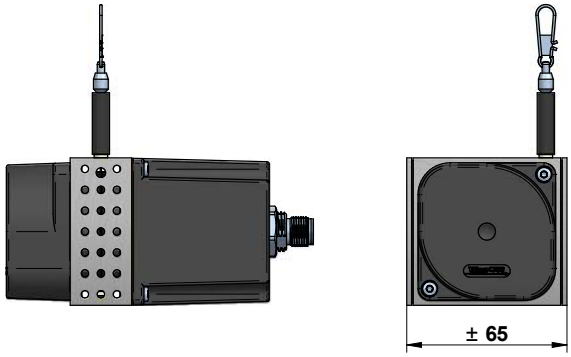

TECHNICAL DRAWING - VARIATIONS

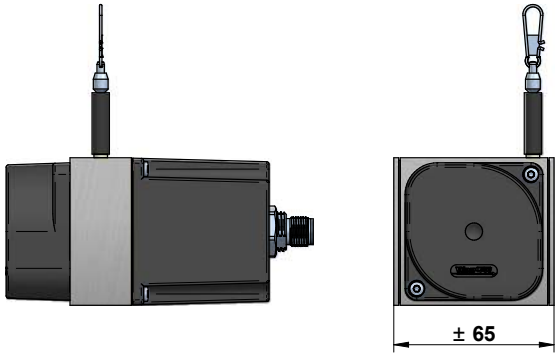

Options L10, L15 and L25: variation with rope tube

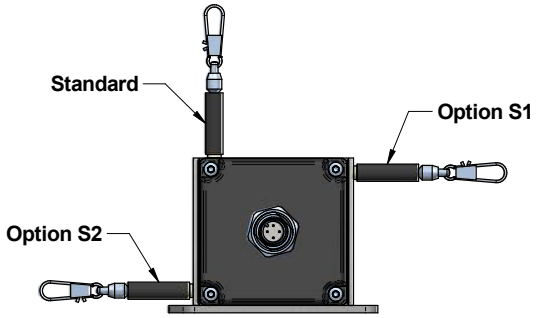

Option C1: housing with perforated plate covering

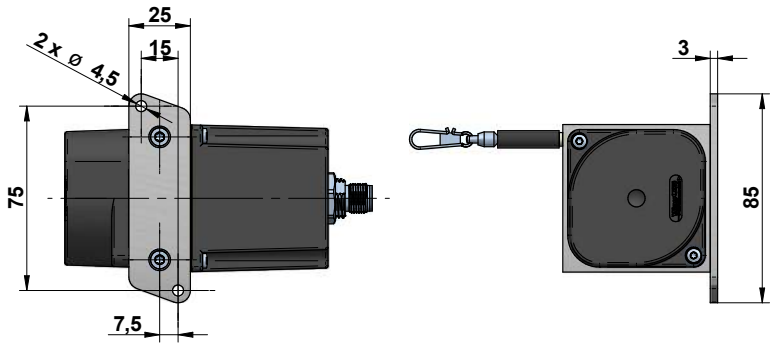

Option C3: closed housing

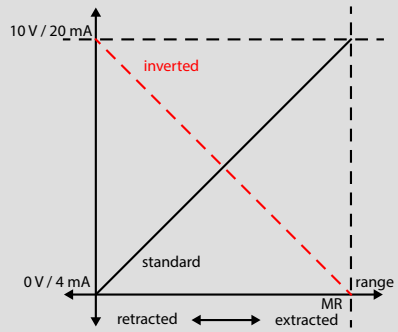

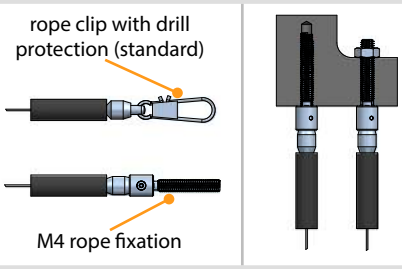

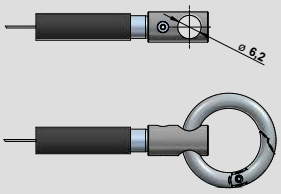

Options S1 and S2: changed rope outlet

Option BP: variation with base plate

OPTIONS

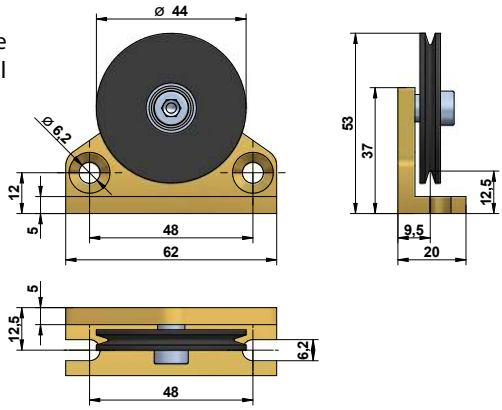

Option	Order code	Description
Improved linearity (not in combination with S1 or S2; possible combinations see page 2)	L10, L15, L25	Improved linearity 0.1 % (L10), 0.15 % (L15) or 0.25 % (L25). Option L10 is not combinable with outputs 5R and 10R. Options L15 and L25 are only combinable with output 5R or 10R. Changed technical drawing see page 4.
Inverted output signal (analog output only)	IN	The analog signal of the sensor is increasing by extracting the rope (standard). Option IN inverts the signal, i.e. the signal of the sensor declines by extracting the rope. 
Redundant output signal	R1, R2, R3, R4	By using a double potentiometer the sensor delivers two independent output signals. R1: 2 x potentiometer output R2: 2 x voltage output R3: 2 x current output R4: 2 x CANopen
Changed rope outlet (only in combination with C1 or C3; drawing see page 4)	S1, S2	Standard: rope outlet at the top S1: rope outlet on the right side S2: rope outlet on the left side
Sensor housing (drawing see page 4)	C1, C3	Standard: open housing *(Especially suited for applications under the conditions of fine dust and fluids.)* C1: housing with perforated plate covering *(Especially suited for applications under the conditions of dirt, particle size >2 mm and fluids.)* C3: closed housing *(Especially suited for applications under the conditions of adhesive dust, cement, concrete, clay, protection against impact and shock.)*
Wire rope diameter	D05K, D07K, D10K	The wire rope is made of V4A stainless steel, 1.4401 with a synthetic coating. Please choose the wire rope diameter in part two of the order code. D05K: Ø 0.5 mm (standard) D07K: Ø 0.7 mm D10K: Ø 1 mm (not with measurement ranges 3.5 m and 4 m)
Rope fixation by M4 thread	M4	Optional, pivoted rope fixation with screw thread M4, length 22 mm. Ideal for attachment to through holes or thread holes M4. 
Rope fixation with cylindrical pin and M6 through bore	ZH, ZR	ZH: cylindrical pin with M6 through bore ZR: cylindrical pin with M6 through bore and carbine ring 
Protection class IP69K (only in combination with cable output)	IP69	All relevant components are completely encapsulated. Suitable for close-range high pressure or high temperature spray downs.
Increased temperature range Low	T40	The use of special components allow a working temperature down to -40 °C (up to +85 °C).
TEDS connector (in combination with analog and cable output only; more information about TEDS)	TD, TDP, TDPS	TD: Assembling TDP: Assembling + programming TDPS: Assembling + programming + 35 measurement points
Base plate	BP	The MH60 is equipped with a base plate.

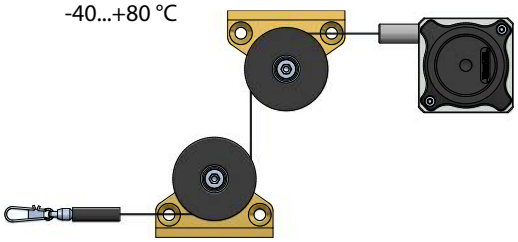

ACCESSORIES

Deflection pulley - UR2

The rope must be extracted from the sensor vertically. The maximum variation from the vertical is 3°. A deflection pulley allows a change in the direction of the wire rope. Several pulleys may be used. The rope clip must not be guided over the deflection pulley.
Suitable for standard wire rope diameter 0.5 mm.

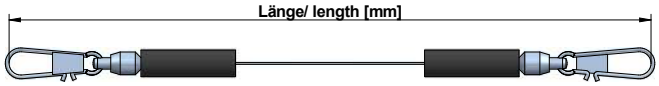

Material foot:	anodised aluminium
Material rope wheel:	POM-C
Mounting:	by 2 hexagon socket or countersunk screws M6, vertical or horizontal mounting possible. Ball bearings: with special low temperature grease and RS-sealing.
Temperature:	-40...+80 °C

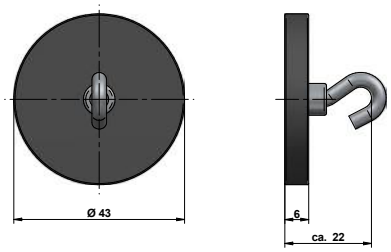

Rope extension - SV

For bridging a greater distance between the measuring target and the sensor a rope extension can be applied. The rope clip must not be guided over the deflection pulley.
Please specify the length needed in your order (XXXX). The minimum length is 150 mm:
SV1-XXXX: rope extension (150...4995 mm)
SV2-XXXX: rope extension (5000...19995 mm)
SV3-XXXX: rope extension (20000...40000 mm)

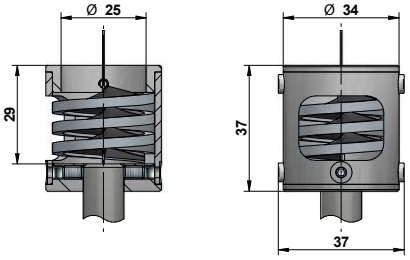

Magnetic clamp - MGG2

Use the magnetic clamp to quickly attach the rope to metallic objects without any assembly time. A rubber coating provides gentle contact (e. g. on varnished surfaces) and prevents from slipping due to vibration. The magnet consists of a neodym core for an increased adhesive force of 100 N. The hook makes it easy to attach the rope clip.

Rope cleaner - RCS (options L10 and L25 only)

Use the RCS rope cleaner to remove dirt from the measuring rope of the sensor. Please note that the maximum measuring range of the sensor is reduced by 29 mm.

APPLICATIONS

The draw wire sensors of the mobile hydraulic series MH were specially developed for the demanding area of construction machines and construction equipment. The sensor can be individually configured depending on the application, in which it is used. Small adhesive and abrasive particles with small grain size can easily be removed when using the open MH versions. Seawater resistant protective grating provide a maximum protection against larger foreign objects like tree branches. In case of applications with high safety requirements, thicker stainless-steel wire ropes are available, as well as redundant, analogue outputs. This mobile hydraulics series offers the possibility the perform accurate and cost-effective distance measurement on construction machinery.
